KS AIRMASSAGE™ AND LUMBAR SUPPORT SYSTEM

RELAXING. INVIGORATING. SOOTHING.

KS AirMassage and Lumbar Support System™ by Kintec Solution, is specifically designed to relieve pressure, massage and support the upper and lower back. Consisting of 5 independent air chambers that can be adjusted through a simple intuitive switch. Regulating extra back or lumbar support to relieve tension points is effortless. The built-in programmable rolling back massage, perfect extra comfort feature to relax after a busy day.

Protected Technologies.

Key Features & Benefits

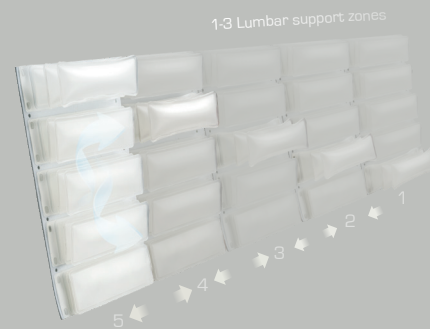

Available for	All Kintec seating solutions and non-motion seating.
Function	Mains power or rechargeable battery pack.
Operation	Operated Independently via a 3 or 5 button switch.
Installation	Attached to the backrest frame.

KS AirMassage and Lumbar Support System unique features:

- Independent inflatable air chambers powered by a compressor and control box.
- Regulate lower air chamber pressure for extra lumbar support.
- 10-minute rolling AirMassage.
- Automotive comfort technology for home seating.
- Easy to install and assemble.

AirMassage and Lumbar Support System Attributes

- Regulate your posture with lumbar support zones 1-3.
- Invigorating 10-minute continuous rolling AirMassage. The AirMassage can be paused or stopped at any point in the massage cycle.
- Massage pressure slowly decreases near the end of the 10-minute cycle.
- Each air chamber is filled for approximately 5 seconds in the following repeating sequence, 1-2-3-4-5-4-3-2-1.
- Air chambers can be emptied to allow the seat to return to its natural state.

Power source

Universal transformers to work worldwide.

Mains plug

Battery pack

AirMassage inflation states

Available switches

Independently operated by either a contemporary 3 button (1 lumbar chamber) or 5 button (3 lumbar chambers) switch in brushed metal or black finish.
